

Fatih Syauqi

Bogor, Jawa Barat, ID · fatihsyq@gmail.com · <https://www.linkedin.com/in/fatihsyauqi17>

I am from Indonesia and working as a software engineer. I have 5 years of experience in developing mobile applications and websites. I am skilled in solving problems, eager to learn new technologies, and able to work effectively in a team. In addition, I am able to handle challenging tasks. See my web portfolio <https://fatihsyauqi.my.id>

EXPERIENCES

PT. SAWERIGADING MULTI KREASI Software Engineer

Bogor, Jawa Barat
Feb 2019 – July 2024

I work full-time at PT Sawerigading Multi Kreasi (Software House) as a software engineer. My responsibilities include developing website and mobile application projects, designing, as well as serving as a DevOps engineer managing servers using the Linux operating system and utilizing VMware for virtualization and cloud computing control.

MINISTRY OF INVESTMENT / BKPM Technical Programmer (Directorate of Regional Potential Potential)

Jakarta, DKI Jakarta
Jan 2023 – Dec 2023

I work part-time developing PIR (Regional Investment Potential) website applications. In developing the website applications, I use a tech stack that includes JavaScript, PHP Laravel, React (GatsbyJS) and C#.NET 5.0.

DIANTAMA SUKSES MANDIRI Fullstack Developer

Kebayoran Lama, South Jakarta
Jan 2017 – Dec 2022

I work part-time at PT Diantama Sukses Mandiri. I built this app from scratch, created an ERD and created a business process and database, see what I made on Diantama Sukses Mandiri:

- Web Application :
An application for online learning and shopping was developed using HTML, JavaScript as the frontend and PHP as the backend language.
Preview : brazedplate.net, jualkomponen.com, heatexchangerspecialist.com, diantamasukses.com
- Mobile Application
This application, developed using JavaScript (React Native), shares similar features with a web application and utilizes an API for communication between applications.

I also implemented a online transaction for Jual Komponen App using *React Native* technology and used the following technologies:

- OneSignal for notifications.
- Midtrans as the payment gateway.
- RajaOngkir for automatic receipt generation.
- GitHub for managing files for team collaboration.
